| <b>BUSINESS CONSULTANT</b>  | <b>AZTEC CONSULTING</b>          | <b>JAN-APR 2018</b>       |
| <ul style="list-style-type: none"><li>• Conducted market research, competitive analysis, and designed sales/marketing strategy for online growth based on market trends; along with a financial forecast.</li></ul>   |                                  |                           |

## Software Projects

- IONIC REBOOT APP**
- Developed a hybrid app for a non-profit org, Reboot, that helps veterans transition into the civilian life.
  - Worked with 3 developers and 1 team lead; used agile methodology; used Git for version control; created issues, pull-requests, and performed code reviews; and created documentation.
  - Integrated Form-Validation on user registration before sending data to the database.
  - Designed RESTful backend server allowing personal data to be stored persistently in an online database.
  - Used: JavaScript, CSS, HTML, Ionic Framework, Heroku, MongoDB, Express, Chart.js, Angular, Git, Jest
- ANGULAR FINTECH WEB APP**
- Created an interactive website using ng2-Charts and a financial market API to display up-to-date stock price.
  - Implemented relational data models to allow users to save *favorite* stocks into an online database.
  - Used: JavaScript, CSS, Clarity-Seed, HTML, Angular, MongoDB, Express, ng2-chart, Stock Market API
- IONIC GOOGLE MAPS APP**
- Design and developed a hybrid application using Google Map's API and the phone's GPS to display near shops around the location. Included a *Discover & Favorite* Page to personalize the app.
  - Enabled location search prediction to interchangeably display it on Google Maps at the user's request.
  - Used: JavaScript, HTML, CSS, Ionic, Geolocation, MongoDB, Express, Cordova, Google Map's API
